SUMMARY

5th-semester Informatics student at Universitas Multimedia Nusantara (UMN) with a 3.98 GPA and a full academic scholarship. I design interfaces in Figma and build them for the web, with a growing interest in AI. Open to tech internships, especially in Software, specifically frontend development.

EDUCATION

Universitas Multimedia Nusantara (UMN), Tangerang, Indonesia 2024 – (expected) August 2028
Bachelor's Degree in Informatics
- GPA 3.98 / 4.00
- Full academic scholarship recipient, from semester 1 to present

SKILLS

- **Programming Languages:** Python, JavaScript, Kotlin, HTML, CSS
- **Software Development:** Object-oriented programming (OOP), web development with React, Tailwind CSS, and Vite, responsive web design, and mobile app programming
- **Artificial Intelligence:** Training and testing AI models, AI-assisted development
- **Tools and Platforms:** Figma, Git, GitHub, GitHub Pages
- **Professional Skills:** Time management, teamwork, working under pressure, quick learning, and explaining difficult concepts clearly
- **Languages:** Fluent English

PROJECTS

ReLa | *Elderly care app, JOINTS UGM 2026 hackathon, Healthcare track (team of 4)*
- Designed the Foundation and Volunteer screens in Figma for an Android app with three user roles (family, volunteer, and foundation).
- Turned the designs into the working app with AI-assisted development (team stack: Flutter, Supabase, Google Gemini).

WEMEN | *Cozy 2D pixel life-sim game, team final project (React, JavaScript, CSS, Vite)*
- Built the snake mini game that players open inside the game world.
- Designed the game's user interface in a cozy pixel-art style.
- Implemented part of the game logic in React and JavaScript.

Song Mood Classifier | *AI project, Machine Learning final project (group of 5, Python)*
- Built and trained the AI model that predicts a song's mood (sad, happy, energetic, or calm) from nine audio features such as energy, loudness, and danceability.
- Trained it on 277,938 labelled songs from the 278k Emotion Labeled Spotify Songs (Moodify) dataset and tested it on 55,588 songs it had not seen, where it reaches 92% accuracy.
- The web demo was built by a teammate, Mikael Geraldius Gunawan.

WORK EXPERIENCE

Teaching Assistant, Object-Oriented Programming (OOP) course, UMN August 2026 to present
- Explain OOP concepts to around 30 students during practical sessions.
- Help students who struggle with the practical modules finish their exercises.
- Help the lecturer grade student assignments.

Private Tutor (Online), Self-Employed March 2023 to present
- Teach all school subjects, except Mandarin, online to elementary and middle school students, with up to 2 students at a time.
- Help students understand difficult concepts, finish their schoolwork, and prepare for exams.

ORGANIZATIONAL EXPERIENCE

Website Division Member, UMN Festival 2026
- Built the Events page of the official UMN Festival website, which shows all the events at UFEST: Unveiling, Ulympic, E-Ulympic, U-Care, and Unify.
- Implemented the page from the design team's mockups using JavaScript, HTML, and CSS.

Security Division Member, PPIF 2026 (Informatics Study Program Introduction)
- Managed queues and the flow of participants during a one-day event, and stood by to help group leaders (PICs) whenever they needed something.

Security Division Member, UMN ECO 2025 (Earth Caring Operation)
- Kept the flow of attendees smooth and the atmosphere calm during a seminar session.

CERTIFICATE

- **Huawei ICT Academy:** HCIA-AI V4.0 course, completed October 2025
